Mylar decals

All decals are USA made.

Tips on applying our decals

All decals are mylar unless otherwise noted. Have the pitted area filled, sanded smooth and painted. Paint must be completely dry prior to installation (usually 3 - 4 weeks). Wash area with soap & water (new paint included) on which decal is to be placed.

For mylar decals (film between lettering): Trim to border of design where possible prior to removing white backing paper. Lightly spray the area with window cleaner (do not use window cleaner in aerosol can). Peel white backing paper from decal and place in position. Squeegee window cleaner from under decal beginning in center and working outward. If air bubbles occur, puncture with pin & smooth down.
Please note: These decals have been printed on a tough mylar film using mylar ink. A pressure sensitive adhesive has been employed on the back of the mylar to insure good adhesion to any clean, hard surface.

For vinyl cut deals (no film between lettering) Special order only: Peel backing paper from decal. The decal will be stuck to the application paper. Align the decal using the design, not the application paper, and firmly press decal into place. Slowly remove the application paper starting at one corner.
Please note: The colors are fused into the vinyl eliminating stacking. CAUTION: Inspect all decal pieces before applying to tractor.

NO REFUNDS on mylar decals if applied to surface and / or if damaged.

NO REFUNDS on vinyl cut decals. Store in a cool, dry place. Do not soak in water.

Operator / service manual reprints - Printed in USA

An operator's manual (reprints only) sometimes referred to as the owner's manual is the manual that came with the tractor. It is the manual that was given to the ultimate consumer by the manufacturer. It can be compared to the manual you receive in the glove box of a new car. This manual gives the owner-operator instructions, shift patterns, capacities (anti-freeze, crankcase, etc.) and adjustment procedures (brakes, clutch, etc). This is a very useful and valuable tool in operating your tractor.

A service manual reprint with wiring diagrams tells you how to take the tractor apart, how to fix it and how to put it back together again. It is a reprint of the manual that the factory furnished the dealer's shop service department, and was not sent or given to individual retail customers. It deals with repairs in the language of a mechanic. Often times it includes valuable information as to specifications, torques, etc. A service manual reprint will offer many short cuts and save you time!
